International Year of Forests

Agroforestry means incorporating trees into farms. As forests shrink, trees on farms become all the more important. The International Year of Forests is an opportunity to highlight the global importance of agroforestry and the impact that trees on farms can have on livelihoods and the effects of climate change.

Evergreen Agriculture

Evergreen Agriculture - the combination of trees in farming systems (agroforestry) with the principles of conservation farming – is emerging as an affordable and accessible science-based solution to caring better for the land and increasing smallholder food production.
